1. Executive Summary

EatLog is a modern, high-performance web application engineered for frictionless daily nutrition, macro tracking, hydration logging, and weight management. It combines natural language AI meal parsing with instant 1-tap staple logging, dynamic TDEE/BMR target computation, and weekly trend visualization.

🗨 User Natural Language Input

🔮 Gemini AI Food Parser

🔥 Firestore / Realtime State

Daily HUD Macros & Calorie Bars

Weekly Trends & 7-Day Averages

Profile (TDEE/BMR Targets)

Staples (1-Tap Fast Log)

Water & Weight Loggers

2. Core Modules & Feature Breakdown

2.1 Authentication & Profile Setup

Identity & Goals

- **Multi-modal Sign-in:** Supports email/password authentication and a frictionless Guest/Demo mode.
- **Dynamic BMR & TDEE Calculations:** Computes baseline metabolic rate and total daily energy expenditure based on age, gender, height, weight, activity level, and fitness objectives (*Maintain*, *Cut*, or *Bulk*).
- **Macro Goal Split:** Automatically calculates target grams for Protein, Carbs, Fat, and Fiber.

2.2 Dashboard & Heads-Up Display (HUD) Daily Tracking

- **Top Macro Bar:** Real-time visual progress bars showing consumed vs. remaining target values for Calories, Protein, Carbs, Fat, and Fiber.
- **Biometric Indicators:** Real-time BMI category computation and goal status indicators.
- **Daily Quick Controls:** Water tracking with quick increment/decrement buttons (+250ml, -250ml) and direct inline weight logging with automatic historical syncing.

2.3 Intelligent Meal Logging AI Powered

- **Natural Language Input:** Users can type plain English phrases (e.g., *"2 boiled eggs and 1 slice of whole wheat toast"*), which are parsed into individual ingredients, calories, and macronutrient breakdowns.
- **Meal Organization:** Categorizes entries across Breakfast, Lunch, Dinner, and Snacks.
- **Staples System (1-Tap Logging):** Frequently consumed meals can be pinned to "Staples" and logged instantly with a single tap from a floating menu.
- **Item Management:** Seamless inline editing and deletion with deletion confirmation modals.

2.4 Weekly Analytics & Nutrition Trends Insights

- **7-Day Rolling Averages:** Summarizes weekly caloric, protein, and hydration intake.
- **Interactive Visualization:** Day-by-day bar and line charts for calories, protein distribution, hydration compliance, and weight trajectories.
- **AI Nutrition Coach:** Context-aware feedback on caloric adherence and nutrient balance.

2.5 Food & Nutrition Lookup Database

- **Instant Search:** Quick lookup database for common foods, portion sizes, and macro densities.
- **Recent History Integration:** Add previously logged items directly from the search tab.

3. Step-by-Step User Workflows

Workflow A: Logging a Meal via Natural Language

- 1 Navigate to the **Daily** tab.
- 2 Focus the bottom input bar ("*Log meal...*").
- 3 Type the description (e.g., "*Grilled chicken breast with 1 cup brown rice*").
- 4 Click the send button or press Enter.
- 5 The parsed nutritional breakdown is added to the meal list, and HUD macro rings immediately update.

Workflow B: 1-Tap Logging from Staples

- 1 Click the **Staples** button (★) on the bottom action bar.
- 2 Select the desired saved item from the popup drawer.
- 3 The meal is instantly recorded for the current day without re-parsing.

Workflow C: Logging Hydration & Updating Weight

- 1 On the **Daily** dashboard, locate the Water widget.
- 2 Tap +250ml to increment intake.
- 3 Tap the **Edit** icon next to the Weight widget, enter current weight (e.g., 58.5 kg), and click **Save**.

Workflow D: Reviewing Weekly Trends & Goals

- 1 Click the **Weekly** tab in the navigation header.
- 2 Inspect the 7-day average cards for Calories, Protein, and Water.
- 3 Review trend charts to ensure compliance with caloric deficits or bulking goals.

4. Visual Highlights & Screen Captures

4.1 Daily Dashboard & HUD Macro Tracker

UI View: /#app (Daily)

The central hub showcasing real-time calorie progress, macro breakdown bars, hydration controls, and daily meal timeline.

4.2 1-Tap Staples Quick Add Drawer

UI View: Drawer Menu

Drawer interface for instantly logging frequently recurring meals without repetitive typing.

4.3 Weekly Analytics & Trend Charts

UI View: /#app (Weekly)

Comprehensive multi-metric charts for historical consistency tracking and AI Nutrition Coach feedback.

4.4 Quick Food Lookup & Search

UI View: /#app (Lookup)

Instant nutritional database search with portion sizes and recent history logs.

4.5 Profile, Biometrics & Dynamic Target Blueprint

UI View: /#app (Profile)

Calculates BMR, TDEE, BMI, macro targets, and supports full CSV data export.

5. UI/UX Evaluation & Performance

CATEGORY	ASSESSMENT	DETAILS
Visual Aesthetics	Excellent	Clean dark aesthetic with high-contrast neon accents (green, cyan, amber) for easy macro distinction.
Responsiveness	High	Instant UI updates with zero perceptible lag on water logging and staple additions.
Ergonomics	Intuitive	Bottom-docked input bar facilitates rapid single-handed logging.
Error Handling	Robust	Confirmation prompts on destructive actions (e.g. meal deletion) prevent accidental data loss.
